Software Skills

- Dart, Flutter
- Firebase
- Play store Distribution
- Xcode
- Animations
- GetX, Provider
- Figma, Adobe XD
- REST API
- Push Notification
- MVC Pattern
- Android Studio
- Git, GitHub
- Shared Preference
- Flutter web
- PostMan

Work Experience

BA Technology

Nov-2023 to Nov-2024

- I have developed 3 applications using the flutter framework.
- Worked on different types of apps like **BtoB and BtoC** Ecommerce Apps.
- Integrated firebase functionalities in Ecommerce Apps.
- Implemented **RESTful API**.
- Implemented continuous deployment via Github actions.

Globytex

Apr-2023 to Nov-2023

- Proficient in Flutter and Dart for building cross-platform mobile applications
- Utilized Dio for API interactions, handling complex requests, and managing responses.
- Expertise in Firebase integration for authentication, database, cloud functions, and push notifications.
- Communication with the backend through API such as **HTTP** and **DIO**.

Projects

Chanakya Maths Kendra – Flutter App

- Integrated real-time video streaming using **Jitsi Meet SDK** for student class participation.
- Developed app based on **MVVM Pattern**
- Integrated push notifications to alert users of upcoming classes and important updates using firebase Cloud Messaging.
- Integrated GetX, **Easebuzz payment gateway** and LocalDB shared preference(NoSQL) is used.

PROJECT 2: Veelgo – Flutter App

- Veelgo is a courier and vehicles booking app.
- Enhanced user experience with real-time tracking for delivery vehicles, allowing users to monitor their parcels' location and estimated arrival times.
- Implemented delivery status changes, ensuring users can cancel orders and change in real-time.

PROJECT 3: OYE – Flutter App

- OYE is a BtoC app like Redbus and Abhibus.
- I have integrated advanced filters (e.g., departure time, arrival time, bus type, seat availability).
- I have developed a dashboard for managing routes, buses, and bookings.
- Allowed users to view and choose preferred seats.
- Used **GetX state management** in the app.
- Managed user data, booking history, and schedules using Firebase.

Education
